

AKGEC SKILLS FOUNDATION

Training Program Details

FAB LAB CENTRE OF EXCELLENCE

Training/Course Title:	Innovation BootCamp	
Target Audience:	B.Tech / BE / Diploma (All Branches)	
Fee:	Rs. 11000	
Duration:	80 Hrs.	
Module	▪ Safety practices and FABLAB orientation ▪ Innovation mindset and engineering problem identification ▪ Design Thinking framework for product development ▪ Electronics and embedded systems fundamentals ▪ Microcontroller programming (Arduino / ESP32) ▪ Sensor, actuator, and communication interfacing ▪ Introduction to PCB design and fabrication workflow ▪ CAD modeling for product enclosures and components ▪ Design for Additive Manufacturing (DfAM) ▪ 3D printing, post-processing, and assembly ▪ System integration, testing, and debugging ▪ Team-based capstone project and working prototype development	
Outcome:	▪ Apply design thinking to solve real-world engineering problems ▪ Design and program embedded systems for functional products ▪ Interface sensors, actuators, and communication modules ▪ Design basic PCBs and understand fabrication processes ▪ Create mechanical components using CAD and 3D printing ▪ Integrate electronics and mechanical subsystems ▪ Test, debug, and optimize complete systems ▪ Develop a working engineering prototype suitable for demos, hackathons, or startups	
Certification:	Upon successful completion, participants will be awarded a Globally recognized joint certification from FAB LAB and AKGEC.
