

AKGEC SKILLS FOUNDATION

Training Program Details

FAB LAB CENTRE OF EXCELLENCE

Training/Course Title:	Innovation BootCamp	
Target Audience:	School Students	
Fee:	Rs. 5000	
Duration:	80 Hrs.	
Module	▪ Introduction to innovation and problem-solving ▪ Design Thinking process (empathize, define, ideate, prototype, test) ▪ Basics of electronics and embedded systems ▪ Microcontroller programming (Arduino / block-based coding) ▪ Sensor and actuator interfacing ▪ Introduction to PCB design and basic fabrication concepts ▪ 3D design and modeling for prototypes ▪ 3D printing process and hands-on printing ▪ Integration of electronics with 3D-printed parts ▪ Testing, debugging, and improvement of prototypes ▪ Team-based innovation project and working prototype development	
Outcome:	▪ Understand the fundamentals of innovation and design thinking ▪ Apply creative problem-solving to real-life challenges ▪ Build and program basic embedded systems ▪ Design simple PCBs and electronic circuits ▪ Create 3D models and print physical components ▪ Integrate electronics and mechanical parts into a system ▪ Develop a complete working prototype ▪ Improve teamwork, creativity, and presentation skills	
Certification:	Upon successful completion, participants will be awarded a Globally recognized joint certification from FAB LAB and AKGEC.
