

AKGEC SKILLS FOUNDATION

Training Program Details

FAB LAB CENTRE OF EXCELLENCE

Training/Course Title:	Industrial Training Program 3D printing	
Target Audience:	Working Professionals	
Fee:	Rs. 11000	
Duration:	80 Hrs.	
Module	▪ Industrial safety practices and 3D printing lab orientation ▪ Fundamentals of additive manufacturing and industrial applications ▪ Industrial 3D printing technologies (FDM, SLA – overview) ▪ 3D printer hardware, calibration, and maintenance ▪ Industrial materials and material selection ▪ CAD modeling for industrial components ▪ Design for Additive Manufacturing (DfAM) ▪ Slicing, process parameters, and quality control ▪ Printing defects, troubleshooting, and optimization ▪ Post-processing and surface finishing methods ▪ Rapid prototyping and low-volume production ▪ Industrial case studies and hands-on mini project	
Outcome:	▪ Safely operate industrial 3D printing systems ▪ Select appropriate materials and technologies for applications ▪ Design and optimize components for additive manufacturing ▪ Configure printers and control print quality ▪ Identify and resolve industrial-level printing issues ▪ Develop functional prototypes and production-ready parts	
Certification:	Upon successful completion, participants will be awarded a Globally recognized joint certification from FAB LAB and AKGEC.
