

AKGEC SKILLS FOUNDATION

Training Program Details

FAB LAB CENTRE OF EXCELLENCE

Training/Course Title:	Industrial Training Program Embedded / Internet of Things	
Target Audience:	Working Professionals	
Fee:	Rs. 11000	
Duration:	80 Hrs.	
Module	▪ Industrial safety practices and embedded system overview ▪ Embedded hardware fundamentals and controller architecture ▪ Industrial sensors and actuators interfacing ▪ Embedded programming for industrial applications ▪ Power supply, protection, and signal conditioning ▪ Industrial communication protocols (UART, RS-485, Modbus) ▪ Industrial IoT (IIoT) architecture and Industry 4.0 concepts ▪ Wireless communication and MQTT basics ▪ Cloud platforms and industrial data visualization ▪ IIoT security, reliability, and maintenance ▪ Industrial applications and case studies ▪ Hands-on industrial mini project	
Outcome:	▪ Apply embedded systems safely in industrial environments ▪ Interface industrial sensors and actuators with embedded controllers ▪ Develop reliable embedded programs for industrial automation ▪ Implement wired and wireless industrial communication protocols ▪ Design and deploy basic Industrial IoT (IIoT) solutions ▪ Monitor machines and processes using cloud dashboards ▪ Improve maintenance efficiency through data-driven insights ▪ Support Industry 4.0 and smart manufacturing initiatives	
Certification:	Upon successful completion, participants will be awarded a Globally recognized joint certification from FAB LAB and AKGEC.
